

Block Diagram .

System Architecture Diagram.

- Rough Sketch campus data base daigram Modules and Features of Campus Navigation System

1. User Module

- Features:
 1. Allows students, staff, and visitors to log in as a user or continue as a guest.
 2. Provides options to select source and destination locations.
 3. Displays route instructions in simple text (step-by-step) or on a map.

2. Navigation Module

- Features:
 1. Calculates shortest path between two points inside the campus.
 2. Provides both textual guidance and visual map directions.
 3. Handles multiple routes (for example, fastest vs. easiest to walk).
 4. Can suggest nearby important landmarks like food court, hostel, or exit gate.

3. Information Module

- Features:
 - a. Stores and displays details of blocks (Academic Block, Engineering Block, Hostel, etc.).
 - b. Provides basic details of events, timings, and notices.
 - c. Can answer FAQs like “Where is the library?” or “How to reach the sports area?”.

4. Admin Module

- Features:
 1. Admin can add, edit, or delete location details.
 2. Can update campus map in case of new buildings or routes.
 3. Manages database backup and ensures data correctness.

5. Security Module

- Features:
 1. Keeps track of visitors entering and exiting the campus.
 2. Stores entry/exit logs linked with Main Entrance and Security Desk.
 3. Helps in monitoring restricted areas if required.
